Overview

CFC is one of the largest security printers in the United States for stocks, bonds, vital records, documents of value and brand protection/authentication devices. We offer more than a century of leading-edge security printing experience along with many advanced security solutions.

The hallmark of our capabilities includes the ability to use intaglio (steel engraved) printing method. This method is utilized to create a tactile recognition feature that is difficult to counterfeit or photocopy. In addition, our special inks and watermarked paper adds durability and extra layers of security and authentication.

Features

• Security printing solution specialists
• Manufactured, stored and distributed under strict banknote conditions
• Ability to combine innovative security features such as holography, intaglio printing, watermarks, forensic taggants and special inks into each document
• Consultative services ensure tailor-made solutions that get results and real protection from fraudulent duplication
• Accurate serial numbering capabilities including special algorithms, check digits and track and trace.

Markets Served

• Stock certificates
• Bonds
• Vital records
• Certificates of authentication
• Certificates of manufacturer origin
• Gift certificates
• Security labels and hang tags
• Tamper-evident labels and tabs
Quality and Versatility

Our highly specialized security printing process utilizes intaglio printing to give your documents a high quality look and feel, while at the same time allows easy detection for counterfeits. Incorporate additional security features into this document and you further reduce the possibility of fraudulent duplication of your negotiable documents.

CFC offers a wide array of security features to protect your documents including:

Intaglio Printing
This printing method can incorporate additional protective measures including micro-print lines, latent images, lathework borders and text.

Watermarks
We have access to proprietary watermarked paper that features visible and invisible security fibers, full chemical sensitivity, holographic threads, micro-printed threads and special toner adhesions.

Special Inks
Documents can be printed using thermochromatic inks, infrared inks (short and long-wave), coin reactive inks, chemically sensitive inks and optically-variable inks to further protect your documents.

By leveraging our world-class printing and security and authentication capabilities, CFC custom-develops today’s most effective security printing solutions.
